Military AI Works, Export Hawks Part 11
"BAe Hawks"

For FS 2004 / FS9
Project Manager: Nick Black nickblack423@hotmail.com

This freeware AI add-on from Military AI Works is the final part in a series of releases charting the Export versions of the British Aerospace Hawk jet fighter trainer. The Hawk is one of the greatest success stories in British aviation history, having been in service since 1976 and over 900 have already been sold around the world, with multiple new orders still being progressed.

This package concludes the export Hawks series from MAIW and features the Development and Testing Hawks operated by Civilian defence contractor and aircraft manufacturer British Aerospace or BAe Systems, based out of BAE Warton. It also features 3 examples of the Hawk 100 series which will become the Hawk T2 and replace the Hawk T1 in service with the Royal Air Force in the near future.

As a special treat for this package we have thrown some extras in. Other aircraft operated by BAe at Warton, either for testing, or for the ferrying around of dignitaries and engineers.

We have included a selection of Multi engine and single engine transport aircraft as well as 2 PC9s operated by BAe.

1. About MAIW

Military AI Works (MAIW) is a loosely affiliated, international group of flightsim enthusiasts who share the common goal of seeing realistic military AI traffic in MS Flightsim. Our goals:

1) Produce only high-quality, freeware packages and products
2) Create military AI traffic accurately within the bounds of MS Flightsim
3) Promote new freeware military AI models, scenery and products
4) Advance military AI modeling of countries around the globe
5) Respect the rights of designers and contributors

To learn more about MAIW or to become a contributor, visit our website at http://www.militaryaiworks.com.

2. Credits
Models:
- Hawk T1 and 100 by Nick Black
- HS-125 and Cessna 177 by Henry Tomkiewicz
- BAe 146 and Jetstream by Project AI
- PC9 by Dave Friswell and Aussim
- Buccaneer with permission of the "Gaffer" (Please visit their website at http://www.ukmil.org.uk)

AFCADs:
- Duncan McKellar
- Gary Barker

Custom Scenery placement
- John Burtenshaw

Scenery Background Polly's
- Edith Black

Flight Dynamics:
- Individual model authors except for NBAI Hawk by Mike "mikewmac" MacIntyre

Repaints:
- Nick Black and Graham King

Voicepacks:
- Stewart Pearson and Nick Black

Flightplans:
- Gary Barker

Beta Testing:
- MAIW Beta Team

3. Units Included in this Package

BAe Systems, Warton, UK.

4. Installation

Step 1) Install this package

1a) Install the package in accordance with the on-screen prompts

Step 2) Remove duplicate AFCAD files

Open your "Flight Simulator 9/Addon Scenery/scenery" folder and remove any previously installed AFCAD's for the following airports (e.g. "AF2_XXXX.bgl," "AF2_XXXX_DEFAULT_XX.bgl" or "PAI_AF2_XXXX_DEFAULT.bgl") NOTE: LEAVE ALL AFCADS BEGINNING WITH "MAIW" as they were installed with step 1:

EGNO
EGNB

NOTE: Failure to remove these duplicate files may result in problems with AI aircraft parking and operation. It is recommended you move these to a temporary folder instead of deleting them; however, you should not need them again as the AFCADs included in this package are thoroughly researched and highly detailed. If you are using add-on scenery for one of the above airfields, it is recommended you do NOT remove the AFCAD for the add-on scenery, but instead remove the MAIW AFCAD file (e.g. MAIW_AF2_EGNO.bgl) after installation.

Step 3) Install callsign voicepacks

3a) If you don't have the EditVoicepack 3.1 freeware installed, download it and install it by clicking here.

3b) Run EditVoicepack and import all vcpmod files included in with this installation

3c) Choose "Import" from the "File" menu

3d) Find the folder "Flight Simulator 9\Military AI Works\UK\BAe Systems\Callsigns" in the "Look in:" window

3e) Select all the files and click open The following callsigns should be added:

FELIX
TARNISH
TESTER

3f) Update the Voicepack for FS9 by choosing "Update Voicepack" from the "File" menu-- ensure the "Custom/Callsigns" box is checked in the left hand window. (note: the update may take a few minutes—do not attempt to start FS9 until the update is complete. Look for "Ready" in the lower left corner)

3g) When ready press save to keep the modifications

3h) The following callsign should be installed in Voicepack as standard

AERONAUT

Step 4) Install Custom Scenery

Included in this package is a set of buildings as custom scenery to spruce up the airports. It should be noted that not installing the scenery will not detract from your enjoyment or use of this package however. To install this scenery you need to do the following:

1) The folder "MAIW Brough" has already been installed into the "Addon Scenery" folder of your FS directory. In order to activate this scenery you must start FS9, go to Settings and find the Scenery Library.

2) Click on "ADD AREA" and navigate to the "MAIW Brough" which should be, by default after installation, located in "Flight Simulator 9\Addon Scenery

3)   Shut down FS and then when you restart the scenery will be installed and ready to use.

**NOTE, If you do not install this scenery to FS before using this package your aircraft will not appear parked in the correct locations. Please ensure that you install this scenery package in order to use this package correctly.

That's it! You've successfully installed this package.

5. Troubleshooting

Problems addressed:
"I've installed the package, but there are no Military AI aircraft at the airports"

"When I go to an airport, there are AI planes parked on top of one another"

"I can't find the aircraft in the aircraft selection menu"

Problem: "I've installed the package, but there are no Military AI aircraft at the airports"

Potential issue: FS9 AI traffic density set too low
Fix action: In FS9, set the AI traffic density slider to at least 2%.

Problem: "When I go to an airport, there are AI planes parked on top of one another"

Potential issue: Multiple AFCADs active for the same airport
Fix action: Using Windows Explorer, open the folder "Flight Simulator 9/Addon Scenery/Scenery." Look for duplicate entries for the following airport identifier:

EGNO
EGNB

Files may be named in several ways. The most common are "AF2_EXXX.bgl," "AF2_EXXX_DEFAULT_XX.bgl" and "PAI_AF2_DEFAULT.bgl." Keep the file names starting with MAIW and remove all others with duplicate airport identifiers.

Problem: "I can't find the aircraft in the aircraft selection menu"

Issue: These are AI aircraft and have been programmed to not show up in the flyable aircraft selection menu
Fix action: If you simply must select these aircraft, use an editing program such as AirEd and change the Aircraft type from "2" to "0"

Problem: "When the Military AI planes talk to ATC, they use only numbers, not callsigns"

Potential issue: Callsign Voicepacks were not installed correctly
Fix action: Run the EditVoicepack software. Look for the following callsigns in the "custom modifications/callsigns" section of the program:

FELIX
TARNISH
TESTER

If any of these are missing, choose "File/import" and open the appropriate .vcpmod file in the folder:-
"Flight Simulator 9\Military AI Works\UK\BAe Systems\Callsigns"

Once this is complete, or if all callsigns are present, ensure the "Custom/Callsigns" box is checked in the left hand window and choose "File/Update Voicepack" to install them into FS9 (this may take a few minutes, do not open FS9 until the lower left of the EditVoicepack screen says "Ready.")

Problem: "I'm following the Military AI aircraft, and they won't come back for touch-and-gos"

Potential issue: You're following your AI aircraft
Fix action: Stop following your AI aircraft. For some reason, a watched AI aircraft does not always behave the way it is programmed to. If you wait for the aircraft at the airport, it will arrive on schedule

6. Notes and Resources

This package was built by the Military AI Works online community. If you are interested in making Military AI traffic more realistic, visit this site!

Flightplans:
The Flightplans are fictional, but have been researched via Internet and message forums.   We have tried to make the plans as "realistic" as possible and have had to use our own judgment. Aircraft in this package fly to bases that may need you to download a separate AFCAD for the aircraft to show up there, AFCADs may be found at Avsim.com, Flightsim.com and the Project AI Afcad site

All Flightplans were created using Notepad.
Flightplans were installed using Lee Swordy's TrafficTools freeware traffic compiler.

Callsigns:
The callsigns used in this package are actual callsigns used by these units, based on information obtained in manuals and on internet.

All callsigns were created using the ingenious EditVoicepack freeware. This program is extremely simple and fun to use—if you need a new AI callsign, give it a try!

AFCADs:
All AFCADs were created using Lee Swordy's AFCAD v2.21. This has got to be one of the finest freeware programs ever created. Want to add some AI parking to your local airport? AFCAD makes it fun!

7. Permissions and Disclaimers

Adverse Effects:
The contents of this package should not adversely affect your FS9 or computer operation if installed according to the instructions. The authors make no guarantee and bear no responsibility for adverse operation or lost/overwritten files on your computer.

Use of Contents:
THESE FILES MAY ONLY BE UPLOADED TO AVSIM or FLIGHTSIM.COM BY THE AUTHOR(s)

THESE FILES MAY NOT BE UPLOADED TO ANY OTHER SITE WITHOUT THE AUTHOR'S WRITTEN PERMISSION. THESE MODELS, REPAINTS AND FLIGHTPLANS ARE FREEWARE AND MAY NOT BE SOLD, OR PUT ON ANY SITE THAT CHARGES FOR DOWNLOADING FREE FILES. THE FILES FOUND IN THIS ARCHIVE MAY NOT BE DISTRIBUTED ON CD OR ANY MEDIUM FOR ANY KIND OF FEE, INCLUDING THE COST OF PRODUCTION, MATERIALS OR POSTAGE. THE MODELS, REPAINTS AND FLIGHTPLANS OWNERSHIP REMAIN WITH THE AUTHORS AS MENTIONED IN THE PACKAGE

Upload to FSPLANET.com will never be allowed by Military AI Works.

Any questions, suggestions and feedback on the contents may be directed to the forums at www.militaryaiworks.com.

Sources:
All information used to create this package was obtained via online, open-source research. All flight plans and schedules, while reasonable for military units, are fictional.

Thanks to everyone who made this possible.
Hello Jackie
